PROFILE

Data Science and AI Engineering student graduating in 2028 with full-stack development experience and hands-on projects in RAG systems, LLM applications, data pipelines, and web platforms. Seeking AI/ML engineering, applied machine learning, or data science internships.

EDUCATION

Software Engineering / AI & Data Science, *Ecole Polytechnique Sousse* 2025 – Present | Sousse
Expected graduation: 2028 · Coursework: machine learning mathematics, probability, statistics, algorithms, Python for data science

Bachelor's in Software Engineering, *Ecole Polytechnique Sousse* 2022 – 2025 | Sousse
Graduated with honors.

PROJECTS

Scanni — Food Ingredient Analyzer *Flutter, Supabase* 2026

- Built a Flutter mobile app with OCR-based label scanning that extracts and parses food ingredients, cross-references E-number additives against a decoded database, and computes nutrition scores relative to WHO daily recommendations. (*Flutter, Supabase, OCR*)
- Integrated Supabase as the backend for ingredient data storage and user history, with real-time sync and offline-friendly state management for a smooth mobile UX.

TicketSphere — Project Management System, *MERN + WebSocket* 2025

- Built a full-stack MERN ticketing platform with JWT authentication, bcrypt password hashing, role-based access control, and input validation — structured using a clean MVC architecture across controllers, routes, models, and middleware.
- Implemented real-time bidirectional updates via Socket.io for live ticket status changes and team notifications, with file attachment support using Multer and a React 18 + Tailwind CSS frontend.

DocuMindRAG 2026

- Built an end-to-end RAG pipeline with hybrid dense+sparse retrieval, RRF fusion, and cross-encoder reranking, achieving 92% groundedness on PDF document Q&A. (*FastAPI, Qdrant, sentence-transformers*)
- Developed LLM evaluation and generation workflows with groundedness scoring, a 50-question benchmark, Ollama/Gemini integration, SSE streaming, and page-aware PDF citations.

PROFESSIONAL EXPERIENCE

Graduation project internship, *GPRO Consulting* 2025 | Sousse, Tunisia

- Built a full-stack project-management platform with React, Node.js, Express, and MongoDB to coordinate 30+ tasks for a 5-person team, including real-time messaging and role-based access control.
- Designed 10+ reusable React components and reduced ticket-status update latency by 40% through client-state optimization and memoization.

Summer Internship, *Axia Solution* 2024 | M'saken, Sousse

- Shipped 20+ pull requests and reviewed peer code on a production e-commerce site serving 50+ products.
- Improved responsiveness across 3 breakpoints and reduced page-load time by about 30% with MongoDB indexing and image lazy loading.

SKILLS

AI & LLM Engineering: RAG systems, LLM APIs, tool calling, agentic workflows, prompt engineering, LLM evaluation, guardrails

Data Science: Python, pandas, NumPy, SQL, exploratory data analysis, statistics, Matplotlib, Plotly

Databases & Modeling: PostgreSQL, MySQL, MongoDB, Supabase, schema design, indexing, query optimization

Software Engineering: TypeScript, JavaScript, React, Node.js, Express, REST APIs, WebSocket, JWT authentication

Cloud & Delivery: AWS (Cloud Practitioner), Git, code review, unit testing, CI basics, Agile/Scrum, Docker

CERTIFICATES

AWS Cloud Practitioner
AWS

AI Engineer for Data Scientists
Associate certification
DataCamp
